

# Workshop Agenda (25-27 November 2026)

## Wednesday, 25th November 2026

### Morning Session 1

- **09:00 - 09:15** (15 min) | Institutional Introduction from the host (Autoritat Portuària Balears)
- **09:15 - 09:30** (15 min) | **Gabriel Jordà** - Local organiser intro, state of mind and objectives of the workshop
- **09:30 - 10:00** (30 min) | **Robert Vautard** - IPCC-AR7 status and avenue for contributions
- **10:00 - 10:20** (20 min) | **Rachel McInnes** - Presentation on CORDEX IPO or wider CORDEX programme
- **10:20 - 10:40** (20 min) | **Jesus Fernandez** - CORDEX update
- **10:40 - 11:00** (20 min) | **Angélique Melet** (visio) - CLIVAR-CORDEX joint working group on regionally downscaled ocean projections

**11:00 - 11:30 | Coffee Break**

## Morning Session 2

- **11:30 - 11:50** (20 min) | **Samuel Somot** - Med-CORDEX Phase 3: modelling pillars, current status and open challenges with a  focus on the Med-CORDEX-CMIP6 Baseline runs
- **11:50 - 12:05** (15 min) | **Leonardo Aragão** - Introduction to AI-driven Empirical Statistical Downscaling initiative
- **12:05 - 12:25** (20 min) | **Marco Reale** - The BGC initiative
- **12:25 - 12:40** (15 min) | **Jose Jimenez** - Introduction to the sea level and coastal risk session
- **12:40 - 12:55** (15 min) | **Gabriel Jordà** - Introduction to ocean stand-alone initiative
- **12:55 - 13:10** (15 min) | **Silvio Gualdi** - Introduction to the Seasonal to Decadal initiative
- **13:10 - 13:30** (20 min) | **Gianmaria Sannino** - Climate Services needs and link to Med-CORDEX data usage

**13:30 - 14:30 | LUNCH**

## Afternoon Session 1

**14:30 - 16:00**
**Parallel Working Session A:** Marine Biogeochemistry (M. Reale, M. Baklouti, 1h30)
**Parallel Working Session B:** AI-based ESD (L. Aragão, 1h+)

**16:00 - 17:00 | COFFEE BREAK AND POSTER SESSION**

**17:00 - 18:30**
**Parallel Working Session A:** Ocean stand-alone modelling (G. Jordà, 1h30)
**Parallel Working Session B:** Working session on the seasonal-to-decadal (S. Gualdi, J. Garcia-Serrano, 1h30+)

**19:00 ICE BREAKER**

# Thursday, 26th November 2026

## Morning Session 1

- **09:00 - 09:20** (20 min) | **Pablo Ortega** - Destination Earth's Digital Twin for Climate Adaptation: An overview of the objectives, model and simulations
- **09:20 - 09:40** (20 min) | **William Cabos** - How do very high-resolution global climate models compare to regional climate systems? A Mediterranean Sea perspective
- **09:40 - 10:00** (20 min) | **Burcu Boza** - Performance of Variable-Resolution CESM Compared with EURO-CORDEX Regional Climate Models in Simulating Euro-Mediterranean Precipitation
- **10:00 - 10:20** (20 min) | **Francesco De Rovere** - The added value of Med-CORDEX coupled high-resolution regional climate models in representing sea surface temperature and marine heatwaves in the Mediterranean Sea
- **10:20 - 10:40** (20 min) | **Angelo Campanale** - Updates on the coupled regional Atmosphere-Ocean ICON configuration over the Mediterranean Sea: From Extreme Events to Climate Scales
- **10:40 - 11:00** (20 min) | **Ivan M. Parras-Berrocal** - Assessing Regional Projections of Marine Climatic Impact-Drivers Using Coordinated Ensembles: Framework and Application to the Mediterranean Sea

**11:00 - 11:30 | Coffee Break**

## Morning Session 2: Baseline Part 2 (11:30 - 13:30)

- **11:30 - 11:50** (20 min) | **Bülent Açma** - Dynamical Downscaling of Climate Projections over Turkey: Methodology, Regional Climate Model Applications, and Sectoral Impacts
- **11:50 - 12:00** (10 min) | **Graziano Giuliani** - ICTP RegCM-ES1-1 update
- **12:00 - 12:10** (10 min) | **Gianmaria Sannino** - ENEA-REG run update
- **12:10 - 12:20** (10 min) | **Marco Chericoni** - Towards CMCC-MedESM: a high-resolution regional Earth system model for the Mediterranean basin
- **12:20 - 12:40** (20 min) | **José A. Jiménez** - Coastal hazards along the Spanish Mediterranean coast
- **12:40 - 13:00** (20 min) | **Espino Manuel** - Future wave climate in the NW Mediterranean from multi-model CMIP6 wind projections: the Impact of Bias Correction
- **13:00 - 13:20** (20 min) | **Ali Amani** - From Regional Climate Information to Coastal Hazards: High-Resolution Nested SWAN Modeling of Extreme Waves in the Eastern Mediterranean

**13:20 - 14:20 | LUNCH**

## Afternoon Session 1

- **14:20 - 14:40** (20 min) | **Trang Duong (IHE)** - Important components to consider in site specific coastal flood modelling and flood risk assessments
- **14:40 - 15:00** (20 min) | **Said Mohamed** - Mediterranean Joint Initiative for Climate Adaptation and Risk Prevention (MedJICARP)

**15:00 - 16:30**
**Working Session:** Med-CORDEX-CMIP6 Baseline runs (S. Somot, J. Fernandez, 1h30)

**16:30 - 17:00 | COFFEE BREAK AND POSTER SESSION**

**17:00 - 18.30**
**Working Session:** Working session on the sea level and coastal risks (J. Jimenez, 1h30)

# Friday, 27th November 2026

## Morning Session 1

- **09:00 - 09:20** (20 min) | **Melika Baklouti** - Recent developments and results related to the Eco3M-MED biogeochemical model
- **09:20 - 09:40** (20 min) | **Natacha Bourg** - Impact of direct human influence on land and rivers in the Mediterranean under Shared Socioeconomic Pathways
- **09:40 - 10:00** (20 min) | **Manfredi Manizza** - The impact of a warmer climate on the ecology and biogeochemistry of the Mediterranean Sea: A model-based analysis
- **10:00 - 10:20** (20 min) | **Marta Alvarez** - CARIMED: a biogeochemical data synthesis product tailored for the Mediterranean Sea
- **10:20 - 10:40** (20 min) | **Dhafer Ferchichi** - Learning from CARIMED: a machine-learning approach to 4D dissolved oxygen fields in the Mediterranean Sea
- **10:40 - 11:00** (20 min) | **Joan Villalonga Llauger** - Potential of a new ML-based temperature and salinity analysis for regional climate models evaluation

**11:00 - 11:30 | Coffee Break**

## Morning Session 2

- **11:30 - 11:50** (20 min) | **Javier Soto-Navarro** - Modelling the Mediterranean circulation: skills and flaws of present day models
- **11:50 - 12:10** (20 min) | **Gabriel Jordà** - Assessing spin-up strategies with a simple Mediterranean emulator

- **12:10 - 12:30** (20 min) | **Nicolas Gonzalez** - Decomposing Steric and Dynamic Sea-Level Changes in Coupled Climate Projections: Implications for the Mediterranean Sea
- **12:30 - 12:50** (20 min) | **Lucien Jordan Tchouassi** - Machine Learning Approaches for Climate Model Bias Adjustment: Evaluation and Application on the EURO-CORDEX BADJAM Dataset
- **12:50 - 13:10** (20 min) | **Leonardo Aragão** - Expanding CMCC seasonal prediction system v3.5 applications to the local scale through statistical downscaling techniques
- **13:10 - 13:30** (20 min) WORKSHOP SUMMARY (MedCORDEX - SC)

**13:30 - 14:30 | LUNCH**

**14.30-16.00**
**Hands on working session**: The Med-CORDEX-CMIP6 Baseline runs (S. Somot, J. Fernandez, 1h30)

**16:00 - 16:30 | COFFEE BREAK**

**16.30-18.00**
**Free space for side events**

**POSTERS**

1. **Chericoni Marco:** Towards CMCC-MedESM: a high-resolution regional Earth system model for the Mediterranean basin
2. **Emir Toker**: Climatic Impacts of a Warmer Mediterranean Sea Simulated by the Fully-Coupled Community Earth System Model version 2 (CESM2)
3. **Alberti Tommaso:** A Study of Meteorological Conditions at Mediterranean Airports in a Changing Climate using Convection-Permitting Regional Climate Models
4. **Salon Stefano**: Advancing decadal and multi-decadal marine climate services for the Mediterranean Sea: the RIVIERADE project
5. **Emanuele Nunzio Tedesco**: ICON-O-LAM - The impact of top model height and marine laminar scaling factor on the simulation of severe cyclonic events: the case of medicane Daniel
6. **Bikem Ekberzade**: Centennial projections of wildfire emissions and burned area for northeastern Mediterranean Basin
7. **Jordà Gabriel**: The DOMOMED project: new advancements for Mediterranean ocean modelling
8. **Mielchen Mariefé:** Parametrisation of Latent Heat Flux over the Mediterranean Sea
9. **Hakima Hamzaoui:** Assessment of the Health Impacts of Future Heat Waves in North Africa Using CORDEX Climate Projections
10. **Ali Amani:** From Climate Scenario Forcing to Coastal Hazards: High-Resolution Assessment of Future Wave Climate along the Egyptian Mediterranean Coast
11. **da Silva Maria Leidinice:** Tracking Mesoscale Convective Systems in CORDEX-CMIP6 Simulations over the European Domain
12. **Ahrens Bodo:** Atmosphere-Waves Coupling in the Mediterranean with ICON-CLM
13. **Boiron Olivier**: Sea-breeze regimes in Marseille: impact on air quality and urban heat islands (UHIs).
14. **Azas Konstantinos:** Deep Learning-based Statistical Downscaling of CMIP5 Climate Projections using an Attention-based U-Net for EURO-CORDEX Emulation
15. **Hamers Sylvain Sylvestre Icaro**: CARIMED data synthesis product: The importance of using quality-checked observations in biogeochemical models
16. **Agulles Miguel**: Multi-decadal shoreline variability at a Mediterranean urban beach: disentangling storm impacts and sea-level influence
17. **Houssine Nibani**: From In Situ Ocean Observations to Climate-Resilient Coastal Management: The Al Hoceima Marine Observatory in the Alboran Sea
18. **Menghal Parth Sanjeev**: Influence of sea breezes on air pollution above Marseille Metropolitan Region
19. **Badr Rania**: Mangrove Ecosystems in South Marsa Alam – Climate Change Adaptation and Mitigation Research
20. **Bukar Muhammad Mala**: Hydroclimatic Extremes and Surface Water Dynamics in Closed Basins: A Comparative Assessment of the Nigerian Lake Chad Basin and Mediterranean Watershed Responses to Precipitation Anomalies
21. **Erturaç Mehmet Korhan** Coastal Record of Historical and Contemporary Storms along the SW Black Sea (Istanbul - Burgas-Varna) / Building late Pleistocene - Holocene Relative Sea Level Curve for the Black Sea
